Summary

My name is James Dimacali, I am a 20-year-old Filipino with a passion for coding and problem-solving, aspires to excel as a Full Stack Developer. Equipped with skills in both front-end and back-end development, I am committed to delivering high-quality software solutions and staying updated with the latest industry trends and technologies. Beyond my technical expertise, my hobbies include playing video games and enjoying shows and movies with my girlfriend."

Courses

Meta Frontend Developer
Meta   03/2023 - 07/2023

IBM Full-Stack Cloud Developer
IBM   05/2023 - Present

Skills

Frontend:

Javascript Typescript · HTML CSS ReactJS NextJS · React Native Expo · CSS Tailwind Styled-Components ·
Framer Motion Redux/toolkit Zustand · React Router

Backend:

NodeJS Python ExpressJS · API REST GraphQL Flask · Git Github Docker · MongoDB PostgreSQL MySQL Firebase ·
Supabase Prisma Mongoose · NPM Clerk JWT Next-Auth

Projects

Airbnb Clone
Developed a full-stack Airbnb clone web application using React, Node.js, and MongoDB to enable users to search, book, and list properties.

Utilized: React, NextJS, Typescript, Zustand, Tailwind, Planetscale MySQL, react-hot-toast, Prisma, Cloudinary

- Implemented a user authentication system with JWT for secure login and registration.
- Integrated Google Maps API to display property locations and enable interactive map-based searches.
- Designed and optimized the UI for responsive mobile and desktop user experiences.

E-commerce Admin Console and Store Client
Created a comprehensive e-commerce solution with separate admin and client interfaces, built with React, Node.js, and MySQL.

Utilized: React, NextJS, Typescript, Zustand, Tailwind, Planetscale MySQL, REST API, React-hot-toast, Shadcn ui, Stripe, Axios, Prisma, Cloudinary

- Developed an intuitive admin dashboard for managing products, orders, and user accounts.
- Designed a user-friendly client-side interface with features like product search, cart management, and secure checkout.
- Implemented RESTful APIs for communication between the admin console and store client.

Ai-Saas
Designed and developed a website for an AI-powered Software-as-a-Service (SaaS) platform using NextJS, Flask, and React.

Utilized: React, NextJS, Typescript, Zustand, Tailwind, Planetscale MySQL, ChatGPT API, React-hot-toast, Stripe, Prisma, Cloudinary

- Integrated machine learning models to provide real-time data analysis and insights to users.
- Implemented user role-based access control for managing data privacy and security.
- Utilized Docker for containerization and AWS for hosting, ensuring scalability and reliability.

Mobile Native Job Board
Built a mobile-native job board application for iOS and Android using React Native, providing a seamless job search and application experience.

Utilized: React Native, Expo, REST, Typescript, Rapid API

- Designed a clean and user-friendly UI/UX with swipe gestures and filtering options for job listings.
- Integrated Firebase for real-time job posting updates and push notifications.
- Implemented OAuth-based authentication for easy sign-in with social media accounts.
