JAMES DIMACALI

Full Stack Developer

323-633-0047 | james.dimacali1@gmail.com | https://github.com/jdimacali | Los Angeles, California 90041 |
https://www.jamesdimacali.com/

Skills

Programming Languages: JavaScript | TypeScript | Python | Rust
Frameworks: ReactJS | NextJS | React Native | Expo | CSS | Tailwind | Styled-Components | Framer Motion |
Redux/toolkit | Zustand | React Router | ExpressJS | Flask | Jest
Databases: MongoDB | PostgreSQL | MySQL | Firebase | Supabase | Redis | Prisma | Mongoose
Others: HTML | CSS | API | REST | GraphQL | Git | Github | Docker | NPM | Clerk | JWT | Next-Auth | Vercel | AWS |
Strapi | Stripe

Courses

Meta Frontend Developer - *Meta*   03/2023 - 07/2023
IBM Full-Stack Cloud Developer - *IBM*   05/2023 - Present

Projects

Airbnb Clone https://rental-home-app-cyan.vercel.app/
Developed full-stack Airbnb clone using React, Next.js, and MongoDB to enable user to search, book, and list properties.
Utilized: React, NextJS, Typescript, Zustand, Tailwind, Planetscale MySQL, React-Hot-Toast, Prisma, Cloudinary
- Implemented a user authentication system with JWT for secure login and registration.
- Integrated Google Maps API to display property locations and enable interactive map-based searches.
- Designed and optimized the UI for responsive mobile and desktop user experiences.

E-commerce Admin Console https://e-commerce-admin-ank65i4gi-lilahdim.vercel.app/
Comprehensive e-commerce solution with separate admin and client interfaces, built with React, Next.js, and MySQL.
Utilized: React, NextJS, Typescript, Zustand, Tailwind, Planetscale MySQL, REST API, React-hot-toast, Shadcn UI, Stripe,
Axios, Prisma, Cloudinary
- Developed an intuitive admin dashboard for managing products, orders, and user accounts.
- Designed a user-friendly client-side interface with features like product search, cart management, and secure checkout.
- Deployed RESTful APIs for communication between the admin console and store client.

E-commerce Store Client https://ecommerce-store-lovat-xi.vercel.app/
Created a website for an AI-powered Software-as-a-Service (SaaS) platform using NextJS, Typescript, and React.
Utilized: React, NextJS, Typescript, Zustand, Tailwind, Planetscale MySQL, ChatGPT API, React-Hot-Toast, Stripe, Prisma,
Cloudinary
- Integrated machine learning models to provide real-time data analysis and insights to users.
- Executed user role-based access control for managing data privacy and security.
- Utilized Docker for containerization and AWS for hosting, ensuring scalability and reliability.

Learning Management System Platform https://lms-platform-plum.vercel.app
Built a Learning Management System (LMS) with course viewing and creation, with Stripe for secure payment processing.
Utilized: React, NextJS, Typescript, Zustand, Tailwind, Planetscale MySQL, REST API, React-Hot-Toast, Shadcn UI, Stripe,
Axios, Prisma, Mux Video, Upload Thing
- Orchestrated the creation and customization of engaging courses
- Optimized the user experience by implementing a preview feature course chapters, decreasing bounce rates,
- Facilitated streamlined payment processes using the integrated Stripe gateway, ensuring a secure purchasing experience.

Gweart https://www.artbygwe.com/
Built a Personal Portfolio for an art influencer with backend data management and customizable ui elements.
Utilized: React, NextJS, Typescript, Tailwind, REST API, Shadcn UI, Heroku, Strapi, AWS S3
- Orchestrated the creation and customization of engaging courses
- Optimized the user experience by implementing a preview feature course chapters, decreasing bounce rates,
- Facilitated streamlined payment processes using the integrated Stripe gateway, ensuring a secure purchasing experience.
